

## Polishing

### Cleaning / Sanding

Removing marks like sanded grooves, weather-beaten paint, used traces and areas. Using the smooth sanding compound, and in the second step using polish or finishing polish.

### Polishing

Removing fine scratches, cleaning marks, wet sanded and paint defects from the surface.

### Finish

Polishing up the surface from sanded grooves from grain 2500, marks of microgrooves and leaving no hologram's on the surface. For an excellent surface finish.

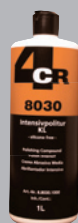

### 3 in 1

Cleaning / sanding, polishing and finish in only one step, even on dark colours.

Description:	Cutting Compound	Polishing Compound	Finishing Compound	Universal Polish. Comp.
Art.-No.:	6.8020.1000	6.8021.1000	6.8022.1000	6.8010.1000

Refinish of aged paints:	●	●	●	●
Polishing tools:	Lambskin, felt disc, Polishing pad	Lambskin, Polishing pad	Lambskin, Polishing pad	Lambskin, Polishing pad

## Polishing Tips

Never use the same polishing pads or lambskin, using the same polishing compounds, and don't use the same cloth for polishing and cleaning. Make sure you don't put to much pressure on the polishing machine whilst polishing, move the polishing machine gently over the damaged and scratched surface which you want to polish. Also depending how the surface has been damaged you don't have to use the Compounds after each other, Cleaning, Sanding, Polishing and Finish. You can choose for yourself what you want to do, and depending on what sort of damage you have on the surface. It's using the right combination of the compounds.

Scratch-resistant paints are a hard challenge for all polishing compounds. The 4CR Polishing compound 8030 has been made especially for the high demand on the paint surface. The 4CR 8030 takes off all scratches made on the surface within seconds and leaves a High gloss finish without any holograms.
